

# WASHIM SHAIKH

+91 8884958185 | washimshaikh33@gmail.com | Vijayapura, Karnataka | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

## CAREER OBJECTIVE

Aspiring technology professional with hands-on experience in Software Development, Artificial Intelligence, Machine Learning, Full Stack Development, and Data Analytics gained through 5 internships and 20+ projects. Proficient in building scalable applications, intelligent systems, and data-driven solutions using Python, AI/ML, NLP, DL, and modern development tools. Passionate about leveraging technology, analytical thinking, and problem-solving skills to develop innovative solutions that create real-world impact.

## EDUCATION

B.E in Computer Science and Engineering– BIT, VTU (2022–2026)

CGPA: 8.2 | PUC – 84.33% | SSLC – 83.04%

## INTERNSHIPS

- Trainee Machine Learning Engineer – Inventeron Technologies** Feb 2026 – May 2026  
Working on real-world machine learning workflows, including data preprocessing, model development, and evaluation.
- Amazon Web Services – iStudio** Sep 2025 – Mar 2026  
Learned cloud computing fundamentals, deployment models, and service integration within the AWS environment.
- Full Stack Development – 1Stop** Jul 2025 – Sep 2025  
Built responsive web applications integrating frontend (HTML, CSS, JS) and backend (PHP, Django, MySQL) components.
- Machine Learning with Python – Yhills** Dec 2024 – Feb 2025  
Implemented machine learning algorithms for classification and regression problems to derive data insights.
- Artificial Intelligence with Python – Coincent** Apr 2024 – May 2024  
Developed AI models using Python libraries for real-world applications like automation and NLP-based tasks.

## PROJECTS (20+)

- OmniDetect AI** | Python, TensorFlow, OpenCV, Computer Vision, Deep Learning, Machine Learning [🔗](#)
  - Built a comprehensive AI-driven detection system capable of recognizing and analyzing various objects and scenarios through advanced computer vision algorithms.
  - Developed real-time detection and classification workflows by integrating deep learning models with image processing techniques.
  - Optimized model performance and system scalability to support intelligent monitoring, automation, and decision-making applications.
- Face Recognition Based Attendance System** | Python, OpenCV, Machine Learning [🔗](#)
  - Developed an automated attendance management system using face recognition and computer vision techniques.
  - Implemented real-time facial detection, identification, and attendance recording with efficient data storage and retrieval.
  - Designed a structured software workflow integrating image processing, database management, and user-friendly operation.
- BrainScan AI – Brain Tumor Detection System** | Python, TensorFlow, Keras, Computer Vision [🔗](#)
  - Developed a deep learning-based CNN model to classify MRI scans as tumorous or healthy, supporting AI-assisted medical diagnosis.
  - Built a comprehensive image preprocessing pipeline including normalization, augmentation, and feature extraction to improve model performance.
  - Deployed the trained model through a Flask web interface for real-time prediction and confidence-based diagnostic support.
- Interactive AgriTrade** | PHP 8, MySQL, FastAPI, Bootstrap 5, Python NLP [🔗](#)
  - Developed a full-stack digital auction platform connecting farmers directly with buyers, improving transparency and reducing intermediary dependency.
  - Integrated FastAPI microservices with multilingual NLP capabilities for real-time Hindi and Kannada text processing and language detection.
  - Implemented secure authentication, database operations, PHPMailer notifications, and optimized MySQL queries for reliable performance.

## TECHNICAL SKILLS

- Languages:** Python, JavaScript, TypeScript, PHP, SQL
- Frontend:** HTML, CSS, Tailwind CSS, React.js, Next.js, Bootstrap, jQuery, Responsive Web Design
- Backend:** FastAPI, Flask, Django, PHP, REST APIs, JSON, API integration
- Databases:** MySQL, SQLite, MongoDB, DBMS
- AI / ML:** ML, DL, NLP, TensorFlow, Keras, PyTorch, Computer Vision, Scikit-learn, XGBoost, Feature Engineering
- Data Science & Analytics:** Pandas, NumPy, EDA, Data Analysis, Data Preprocessing, Predictive Modeling, Data Visualization
- Tools:** Git, GitHub, Docker, VS Code, Jupyter Notebook, Microsoft Office, Power BI
- Specialized Areas:** Vision Transformer, Image Processing, Fraud Detection, Object Detection, Face Recognition
- Emerging skills:** Generative AI, RAG, Prompt Engineering, Vibe Coding, LLM Applications, AI Tools & Development

## CERTIFICATIONS

Python — Infosys | Advanced Prompt Engineering — Simplilearn | Generative AI for Beginners — Simplilearn | CyberSmart — CySeck | Computer Fundamentals — Certified | Certificate of Achievement — NBCE

## LANGUAGES KNOWN

English | Hindi | Urdu | Kannada
